WITH AGE, THE FACE AND SKIN BEGIN TO CHANGE AS COLLAGEN AND ELASTIN LEVELS DIP AND FAT, TISSUE AND MUSCLE DESCEND. DEPENDING ON YOUR AGING CONCERNS, AND THE DEGREE OF SEVERITY, YOUR DOCTOR MAY RECOMMEND A COMBINATION OF BOTH SURGICAL AND NONSURGICAL OPTIONS, WHICH TOGETHER CAN OFFER THE MOST DRAMATIC RESULTS. EVEN THOUGH YOU MAY CHOOSE TO UNDERGO A FACIAL REJUVENATION PROCEDURE, YOU WILL STILL CONTINUE TO AGE, BUT YOU CAN EXPECT TO LOOK ABOUT 10 YEARS YOUNGER THAN IF YOU DIDN'T HAVE SURGERY AT ALL.

BEFORE

AFTER

“I want to fight the signs of aging.”

To correct common aging concerns like under-eye bags and jowls, this patient had a mini-facelift, endoscopic browlift, lower blepharoplasty and a TCA chemical peel to the lower lids. She also had Botox injected into her crow's-feet and between her brows, Restylane in her tear-troughs, to soften them, and Juvéderm into her lips to plump them up. Procedures performed by Goesel Anson, MD; Las Vegas, NV.

- A** ENDOSCOPIC BROWLIFT

redefining nature

Plastic surgeons Drs. Goesel Anson and Terry Higgins are known among the community for their natural-looking results in a city where over-exaggerated enhancements are commonplace. "If I've done my job well, nobody knows I was there and the patients look very natural," says Dr. Higgins, who devotes much of his time repairing post-pregnancy figure flaws. Dr. Anson focuses her practice on reversing facial aging. "I want my patients to look as good as they can, at whatever age they are, while still maintaining a natural result. It's a philosophy we truly believe in," she says.

Dr. Anson's reputation for natural results has put her name on the list of Best Doctors in Las Vegas by *Las Vegas Life* and *Las Vegas* magazines. "I am proud to be considered a top choice among physicians and health-care professionals within my community," says Dr. Anson. Trained in general surgery and plastic surgery, Drs. Anson and Higgins enjoy helping patients "redefine nature." "I pride myself in staying current in facial surgery. Patients count on me to discern between fads and true innovations," says Dr. Anson. "Our patients trust us to not only deliver quality results, but also to help them sift through the hype that's out there about plastic surgery and skin care," adds Dr. Higgins.

In addition to a complete menu of surgical procedures, Dr. Anson and Dr. Higgins have pioneered their own skin-care line, which is simply named Anson & Higgins™. They have spent the last four years working with chemists to bring better, more affordable products into the marketplace. "Aging is a fascinating and complex process that requires a comprehensive approach," says Dr. Higgins. Dr. Anson adds, "Providing our patients with skin care, supplements, lasers, Botox®, fillers and surgery allows us to blend all the tools at our disposal to create truly personalized treatment plans."

The doctors have an elegant boutique practice and surgery center designed specifically with their patients in mind. "We make every effort to provide our patients with an environment that places them at ease," says Dr. Anson.

INSIDE INFORMATION

AESTHETIC ABDOMENS

Within his circle of influence, Dr. Higgins is known as a go-to doctor for **TUMMY TUCKS**. Much of his work is reparative; many of his patients are moms who have extra skin and lost muscle tone due to multiple pregnancies. "No amount of sit-ups is going to tighten the abdominal area once the muscles underneath have been stretched and separated due to childbirth," Dr. Higgins explains. Many of the doctors' patients come to them as **WORD-OF-MOUTH REFERRALS**, since the results they routinely attain are extremely natural looking. "The key with a tummy tuck is the belly button," says Dr. Higgins. "It takes an artistic eye and experienced surgical skills to get it right, because if the naval is not correct, it's a telltale sign you've had surgery." A proponent of combined procedures, the surgeons often offer **ULTRASONIC** or **TUMESCENT LIPOSUCTION** of the hips and thighs, in conjunction with abdominoplasty. "Contouring the hips and outer thigh area at the same time as the tummy tuck can work wonders in terms of giving a woman a **LEANER PHYSIQUE**."
